

BAS920COMM

BA SYSTEMS
BUILDING AUTOMATION SYSTEMS

Datasheet

BAS920COMM is a communication module applicable for BAS920 expansion.

BAS920COMM includes

- 1 x M-Bus port
- 1 x RS232 to M-Bus converter port
- 1 x combined RS485/RS232 channel

The M-Bus is a master interface with support for up to 16 M-Bus slave units.

The RS232 to M-Bus converter port can be used for M-Bus unit configuration, when connected to a PC.

The combined RS485/RS232 channel may send data on both interfaces simultaneously, but can only receive data on one interface.

RS485 can be used for ModBus, Genibus, DNIP and other BAS RS485 based protocols. RS485/RS232 may be used for Kamstrup meter communication or other meter units using KMP protocols. It will also be applicable for other systems using RS485/RS232 signalling, however protokol adaptations may be required.

M-Bus and RS485 interface are galvanically isolated from the BAS920 system.

Notes:

- J4, J1 = Expansion bus in
- J5, J2 = Expansion bus out
- SW1, RS485 Bus termination
- T.OFF = Termination off
- T.On = Termination on
- J3/232MB = RS232 to M-Bus converter port
- J7 = RS485 port
- J6 = RS232 port
- J9 = M-Bus port
- J8 = 24VAC power for M-Bus
- D14 = Status diodes

J3 / Pin no.	J3 / Signal
1	5V
2	5V
3	TXD
4	RXD
5	GND
6	GND

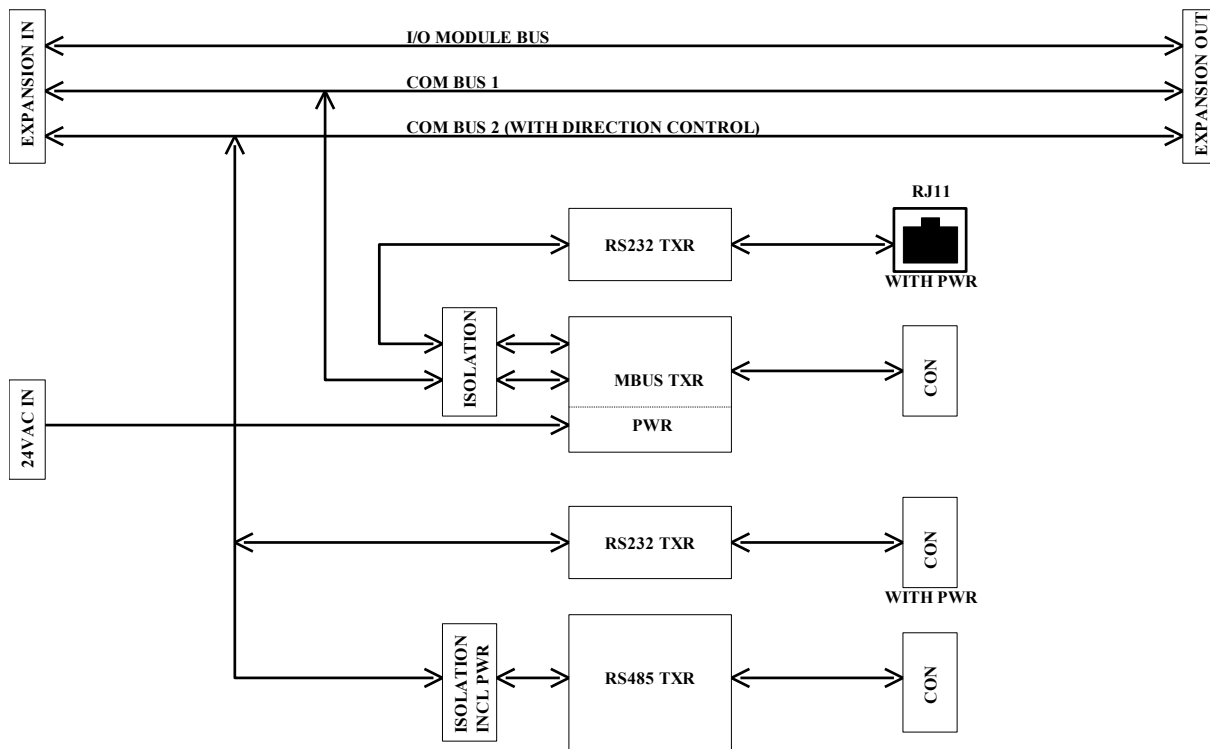

J6 / Pin no.	J6 / Signal
1	GND
2	RS232.TXD
3	RS232.RXD
4	5V

J8 / Pin no.	J8 / Signal
1	24VAC_F
2	24VAC_N

J7 / Pin no.	J7 / Signal
1	GND
2	RS485.A
3	RS485.B

J9 / Pin no.	J9 / Signal
1	MBUS+
2	MBUS-

BAS920COMM BLOCK DIAGRAM

Tecnical data	
Power supply:	Supplied by BAS920, and additional 24VAC/300mA for M-Bus circuit supply.
Temperature	Storage -20 °C til +70 °C Operating -10°C til +60°C
Humidity	Max. 90% RH, non condensing
Enclosure	ABS/PC, IP20 71 x 86 x 58 mm 100 g
Communication channels	RS485/RS232 M-Bus RS232 to M-Bus converter
