BAS 920 EXT

Datasheet

BAS 920 EXT is a bus extender module pair that's made for BAS 920

BAS920 EXT is a set consisting of two modules that are used when an installation contains more than one row of modules. This makes it possible to spread an installation over more than one row.

Please note that if a BAS920COM, BAS920COMM or BAS920DIOM is used, this module must be placed before the first extender module.

More than one set of BAS920EXT can be used per installation.

The BAS920EXT modules are connected with standard Cat-5 ethernet cable. The combined cable length can not exceed 10 meter.

Technical data	
Power supply:	Powered from the BAS920
Temperature range	Storage -20 °C to +70 °C Active -10°C to +60°C
Humidity	Max. 90% RH, not condensing
Mechanics	ABS/PC, IP20 35 x 86 x 58 mm 100 g
Communication	4 connectors to be connected with two cables, combined cable length must not exceed 10 meter.s Cat-5 ethernet must be used
